ON-SITE REGISTRATION HOURS

THURSDAY
September 14
1:00pm - 8:00pm

FRIDAY
September 15
6:00am - 5:30pm

SATURDAY
September 16
6:30am - 6:00pm

SUNDAY
September 17
6:30am - 5:00pm

EXHIBIT HALL HOURS

THURSDAY
September 14
Exhibit Hall Grand Opening
6:00pm - 8:00pm

FRIDAY
September 15
9:00am - 4:30pm

SATURDAY
September 16
7:00am - 4:30pm

SUNDAY
September 17
7:00am - 11:00am

REGISTRATION

Attendees will be required to sign in at the registration desk and in the lab rooms before participating.

LABORATORIES

Check your welcome letter for the labs for which you registered. Attendees' names will be on a sign in sheet in the each room. Be sure to sign in! All labs are located in the Music City Row Rooms, see page 7. To register for an available lab on-site, visit the registration desk.

CONTINUING EDUCATION CREDITS

Attendees of the Veterinary Dental Forum can earn up to 24 hours of continuing education (CE). A certificate is provided in your attendee packet. Attendees must sign an attendance roster at registration for possible replacement of lost CE forms in the future.

NAME BADGES

Name badges will be required for participation in all sessions, workshops, laboratories and the exhibit hall. Badges are included in your conference materials received at the meeting registration desk and are only available for registered attendees and registered guests.

BREAKFAST, MORNING AND AFTERNOON BREAKS

NEW for 2017! Early morning continental breakfast, coffee, tea and juice stations will be provided in the exhibit hall prior to the start of presentations. Mid-morning and afternoon breaks with beverages will be provided in the exhibit hall.

LUNCHESES

Box lunches (on Friday and Saturday), are included with Forum registration. Attendees were asked to indicate whether they would like to receive a box lunch on the registration form. Lunch will be from 12:10pm-1:30pm to allow additional time to visit the exhibits. Lunch on Sunday is "on your own." Attendees will find many dining options within a five minute walk. Please see your attendee packet for a list of nearby options.

CANCELLATIONS AND REFUNDS

Cancellations and refunds are no longer permitted. A charge of \$50 will be assessed for each change made in laboratory selections.

PRINT STATION

To print notes from the proceedings USB, a print station will be located near the VDF exhibit hall in the outside foyer.

CYBER CAFÉ

The Veterinary Information Network (VIN) is once again sponsoring a Cyber Café which is located in the Broadway Ballroom foyer.

2017 PROCEEDINGS BOOK

The 2017 digital Proceedings is available online for a limited time. Please see our website, www.VeterinaryDentalForum.org for the link.

2016 USB

Limited 2016 VDF Minneapolis Proceedings USBs will be available for purchase at the registration desk for \$35.

NO VIDEOTAPING is permitted in any sessions or labs.

TICKETS* purchased for events can be found in your attendee packet.

**Tickets required for Country Music Hall of Fame, Boehringer Ingelheim Hosted Breakfast and Guest Welcome Reception.*

SPECIAL MEETINGS & EVENTS

CURRENT AS OF PRINTING

Consult a map of the meeting space on page 6 for room locations. Labs will be in the Music Row Rooms.

7:00am - 11:00am Broadway Ballroom Exhibit Hall open
12:10pm - 1:30pm Lunch on your own
5:40pm Adjourn

GUEST SPEAKERS

Small Animal Keynote Lecturer “On the Cusp”

Lecture: Saturday, September 16th, 8:00am - 12:00pm, Legends BR D, E-G

“Interactions of Humans and Animal Dentistry”

VDF is pleased to welcome Dr. Gordon Christensen, DDS, MSD, PhD.

Gordon J. Christensen is Founder and Chief Executive Officer of Practical Clinical Courses (PCC), Chief Executive Officer of Clinicians Report Foundation (CR), and a Practicing Prosthodontist in Provo, Utah.

Gordon and Dr. Rella Christensen are co-founders of the non-profit CLINICIANS REPORT FOUNDATION (previously named CRA), which Rella directed for many years. Since 1976, they have conducted research in all areas of dentistry and published the findings to the profession in the well-known CRA Newsletter now called CLINICIANS REPORT.

Gordon's degrees include: DDS, University of Southern California; MSD, University of Washington; PhD, University of Denver; and two honorary doctorates.

Early in his career, Gordon helped initiate the University of Kentucky and University of Colorado dental schools and taught at the University of Washington.

Currently, he is an adjunct professor at the University of Utah, School of Dentistry. Gordon has presented thousands of hours of continuing education globally, made hundreds of educational videos used throughout the world, and published widely.

Gordon and Rella's sons are both dentists. William is a prosthodontist, and Michael is a general dentist. Their daughter, Carlene, is a teacher.

He is a member of numerous professional organizations.

Specialists in Training - Anesthesia

Lecture: Friday, September 15th, 8:00am-12:00pm, Legends Ballroom D, E-G

Lab: Sunday, September 17th, 8:00am-12:00pm, Music Row Room 6

This lab attendance is limited to AVDC Trainees only and requires an additional registration fee.

“Anesthesia and Analgesia for the ASA 2 and ASA 3 Dentistry and Oral Surgery Patient”

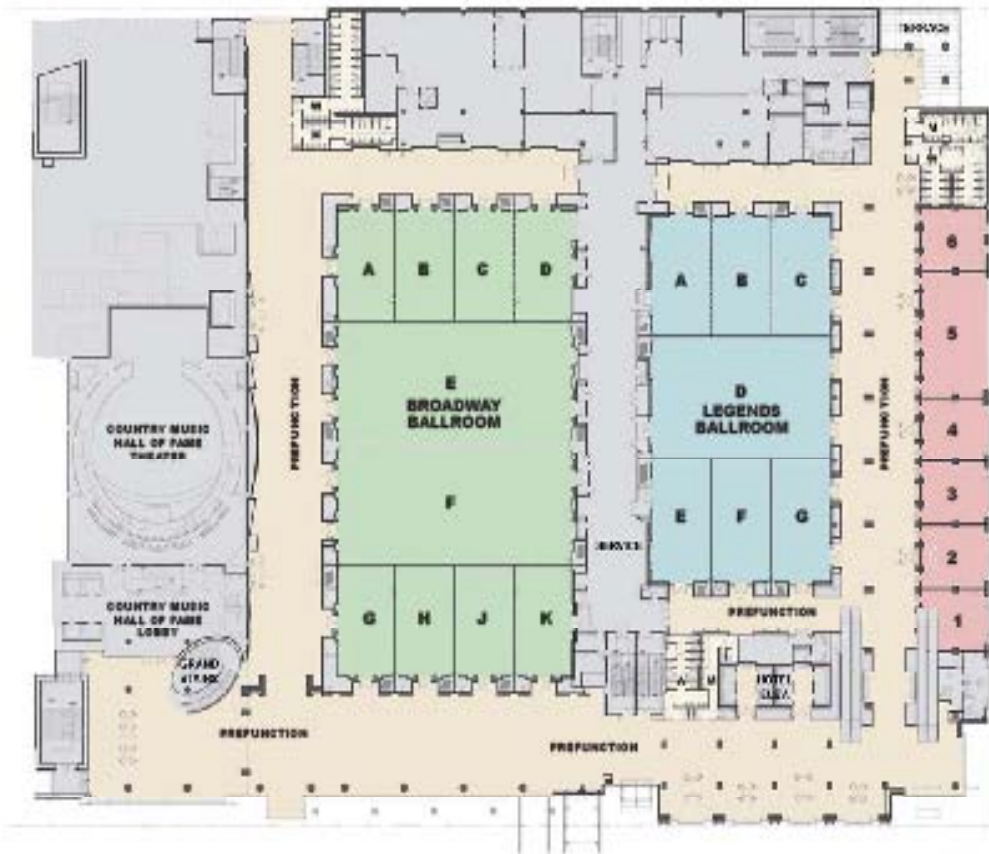

Dr. Luisito S. Pablo received the degree of Doctor of Veterinary Medicine from the University of Philippines in 1978. He completed his Master of Science in Large Animal Medicine and Surgery from Auburn University in 1982. His interest in Anesthesia started when he came back to Auburn University to pursue his PhD in 1984. He started as a visiting Assistant Professor at the University of Florida in 1989. He became board certified in Veterinary Anesthesiology in 1993. Presently, Dr. Pablo is a clinical professor at the College of Veterinary Medicine, University of Florida. He has received numerous teaching awards. He continues to practice veterinary anesthesia in the UF Veterinary Hospitals.

Dr. Luisito Pablo, DVM, DACVAA

Block plaque, calculus, and halitosis with the science of prevention

OraVet® Dental Hygiene Chews combat plaque, calculus, and halitosis where they start—bacterial biofilms.

The mechanism of action is simple but effective: Each daily chew releases chlorhexidine hydrochloride to create a barrier that prevents bacterial attachment.™ When bacteria can't attach, they can't produce plaque biofilms or the volatile sulfur compounds of halitosis. And the scrubbing action of the chew works to provide to effectively remove plaque and calculus.

For more information, contact your sales representative or visit OraVet.com

Interest: You Can Believe in Chlorhexidine

- Chlorhexidine has been extensively tested in human and animal trials
 - Proven technology originally developed for a human oral rinse
- ### OraVet Dental Hygiene Chews
- Efficacy demonstrated in multiple animal trials
 - Novel mechanism of action
 - Exceptional halitosis control†
 - Highly palatable†
 - Available through veterinarians

2017 VDF PROGRAM GRID - POSTER SESSION

SUBJECT TO CHANGE

1. CRANIOMANDIBULAR OSTEOPATHY IN DOGS - CASE REPORT
2. ROSTRAL MANDIBULECTOMY AND ENDODONTIC THERAPY AFTER BILATERAL MANDIBULAR INTRAMEDULLARY PIN AND EXTERNAL FIXATION IN A YOUNG DOG
3. CARIES ON DOMESTIC DOG'S TOOTH: CASE REPORT

Authors will need to be by their posters in the Broadway Ballroom for Question & Answer Sessions during the afternoon break on Friday and the morning break on Saturday.

What is the Helping Hands Scholarship?

The scholarship provides at least a free registration and up to one lab for a vet technician, a vet manager and a veterinarian to the premier veterinary dental event of the year held at the Veterinary Dental Forum.

What is the purpose?

First, is to educate the veterinary dental community of the standards of care and provide an opportunity for a hands on experience. This is one of the core missions of the Foundation for Veterinary Dentistry.
Second, is to increase the size of the membership of the dental community. This will encourage better networking within the vet dental community and result in better care of the dental patient.

Who are the sponsors of this Scholarship?

Watch for information on the next competition in the *Journal of Veterinary Dentistry!*

2017 Helping Hands Scholarship Winners

Lisa Juten from MN

Ines Ott from Germany

Stefanie Perry from AZ

Anthony Starsbury from KY

Madeline Stoops from KY

LABORATORIES AND SCHEDULE

SUBJECT TO CHANGE

Veterinary dentistry is a complex specialty which requires years of education, training and practice. The wet labs and workshops offered by the Veterinary Dental Forum help practitioners to more effectively diagnose and intercept dental problems and treat or refer them appropriately. The lectures and labs (fundamental, intermediate and advanced) are designed to be educational, practical and interesting for those just getting started as well as for those well established in the field of dentistry. Pre-registered attendees will be required to sign in at each lab.

Feline Radiography Lab - This lab will cover the positioning and interpretation of intraoral digital dental radiographs of cats. A study from 1998, showed that teeth that appeared normal, had 41% significant findings upon radiographs and the abnormal teeth, had 53% additional findings. It is estimated that 70% of cats, over the age of 3 years, have some form of periodontal disease and that 30-50% of cats have tooth resorption. Therefore, without dental radiographs, we may be missing dental disease in over half of our feline patients. Limited to 20 participants. **(Techs and DVMs)** *This is a two hour lab. It will be presented twice.*

Fundamentals of Canine Dental Extractions - This lab will teach participants how to surgically remove the most common teeth extracted in the canine patient: maxillary and mandibular canines and carnassials. The proper instruments used to create flaps that are tension free and more easily closed will be shown. Types of suture and needles will be discussed. The question of "how much bone can I remove" will be answered. After this lab each veterinarian will have new skills that they can use when they return to their practice. Limited to 30 participants. *This is a four hour lab. It will be presented twice by different presenters.*

Endodontics 1 - Access Preparation - The endodontic access lab is designed to introduce the basics of the first part of the endodontic triad. Topics that will be covered are anatomy of the tooth as it relates to endodontic therapy, instruments used for endodontic access and how to avoid common mistakes when making your access for endodontic therapy. This lab is intended for the veterinarians who are new to performing endodontic therapy or those who would like more guidance with making their endodontic access. Limited to 30 participants.

Regional Nerve Blocks for Dental Patients- This lab will teach the attendee some very practical, safe and cost-effective ways of controlling pain during and long after oral surgery. You will learn to block strategic nerve points within the oral cavity. The use of opioids in conjunction with a local anesthetic will be discussed to extend the duration of the analgesia well into the next day(s). Many of the new multimodal pain management options will be thoroughly discussed. Limited to 30 participants. *This is a two hour lab. It will be presented twice.*

Essential Periodontal Therapy: The Necessary Equipment and Techniques for Proper Diagnosis, Treatment and Prevention of Periodontal Disease for the Veterinarian and Technician Team- This lab covers instrument selection, usage and care for the treatment of periodontal disease inclusive of probing, charting, identification of visual oral pathology, treatment planning, the use of ultrasonic and hand instrumentation, sharpening techniques and an overview of home care, the mainstay of oral health. Closed root planing and the use of Doxirobe is included as a treatment modality. This is a hands-on wet lab utilizing extracted teeth, skulls and cadavers to recognize pathology. A necessary foundation for veterinarians and technicians who are providing or expanding dental services in their practice. These skills set the stage for advanced training in periodontal therapy and surgery. A lecture will precede the hands-on portion. Limited to 30 participants.

Canine Radiography Lab - Veterinary dental radiography, in particular positioning is one of the most "Positioning for Perfect Rads"- Veterinary dental radiography, in particular positioning is one of the most frustrating aspects of veterinary dentistry. The bisecting angle technique can be demanding and difficult to perform consistently. Positioning the patient, the sensor and the tube head to create quality images can be challenging. A simplified approach can consistently produce quality images with less confusion if a few principles are followed and some variables removed. Limited to 20 participants. **(Techs and DVMs)** *This lab will be presented twice by different presenters.*

Feline Extraction Lab - Feline extractions are technically difficult. After a brief PowerPoint introduction, attendees will get right to work on cadavers for hands on learning with personal attention from a board certified veterinary dentist and his assistants. Limited to 30 participants. *This lab will be presented twice by different presenters.*

"Fill" Me in on the Latest in Restorations - A one-hour lecture, then hands-on laboratory covering the basic equipment & materials with step by step instructions for dentin bonding and composite restorations. Indications, diagnostics, and contra-indications for restorations will be covered. Following the lecture, participants will be given the opportunity to apply dentin bonding, prepare cavity preparations, fill preparations with composite materials and finish the restorations. Limited to 30 participants.

Mandibular Fracture Repair - This laboratory will focus on maxillofacial fracture repair using various techniques such as interdental wiring, maxillomandibular fixation, and interfragmentary wiring. An introductory lecture will be given at the beginning of the laboratory. The focus of the lecture will be mostly on maxillofacial trauma and achieving normal occlusion, a cornerstone of jaw fracture repair. To that point, pharyngostomy tube placement will also be discussed and demonstrated to facilitate appliance placement and maintain correct occlusion. Proper placement of wire and acrylic appliances in the mouth will be reviewed and practiced. Acrylic application will be practiced in combination with the four basic interdental wiring techniques (Ivy loop, Stout, Essig, and Risdon). Mandibular symphyseal separation wiring techniques will also be discussed and be performed by the attendees. Standard equipment utilized for minimally-invasive jaw fracture repair will be discussed and will be available for use during the laboratory. Stabilization of caudal mandibular or TMJ fractures with maxillomandibular fixation will be demonstrated. Canine and feline cadaver heads will be available for creation of various fractures and subsequent reduction. Sawbones mandibular models may also be utilized. This laboratory would be ideal for those preparing for the AVDC examination and trainees in dental residency programs. Limited to 30 participants.

Techniques for Completing Difficult Extractions, Dealing with Complications of Extractions (Root tip removal, Oronasal Fistulae, etc.) This hands-on laboratory will provide participants with the knowledge and skills that will make executing difficult extractions in dogs more efficient, less traumatic and be associated with fewer complications. Participants will have the opportunity to practice a wide variety of techniques for completing difficult extractions in dogs and managing complications of extractions. Techniques that will be reviewed include selection of proper surgical approaches including flap design, proper sectioning of multi-rooted teeth, buccal, interradiolar and periradiolar bone removal. Techniques for efficient removal of fractured root tips will also be reviewed. Participants will have the opportunity to use a wide variety of hand instruments and power equipment including dental elevators, luxators, periosteal elevators, periostomes, luxating-type elevators with modified periostome tips and high speed handpieces with a wide variety of dental burs. Additional techniques that will be utilized to assist in the completion of difficult extractions will include dental radiography to visualize tooth structure perioperatively as needed. Other techniques that will be utilized include the use of short root tip finger instruments that allows quick and easy removal of root tips without causing trauma and the utilization of root tip picks and Peet forceps to help lift and elevate small root tips from an alveolus. Management of additional extraction complications that will be reviewed include repair of oronasal fistulas and retrieval of root tips from the mandibular canal and nasal cavity. Participants will have the ability to prioritize performing various techniques on specific teeth that they desire for additional hands-on laboratory experience to help improve their extraction skills and management of extraction complications. Limited to 30 participants. *This lab will be presented twice.*

Regional Nerve Blocks and Periodontal Therapies for Technicians - This is a hands on lab in which attendees will learn the technique for delivering an effective regional nerve block for the dental patient. Periodontal therapies and hand instrumentation will also be taught. Instrument sharpening techniques will be demonstrated as well. Limited to 30 participants.

LABORATORIES AND SCHEDULE

CONTINUED...

Periodontal Flap Surgery Lab - This is a hands on lab demonstrating periodontal flap surgery in the small animal veterinary patient. We will initiate with a discussion of necessary equipment as well as indications (and contraindications). Following this, we will cover the various flap techniques for proper periodontal surgery. Next, proper treatment of the root surface will be presented. Proper follow up to ensure success will also be covered. Finally, the techniques of guided tissue regeneration will be taught. Limited to 30 participants.

Crown Preparations - Hands on laboratory covering crown preparation, impressions and stone models. Prosthodontics is the dental specialty pertaining to the diagnosis, treatment planning, rehabilitation and maintenance of the oral function, comfort, appearance and health of patients with clinical conditions associated with missing or deficient teeth and/or oral and maxillofacial tissues using biocompatible substitutes. Limited to 30 participants.

How to Really Read that Radiograph - Evaluating what lurks below the gum line paves the course of what needs to be done to help our patients. This presentation will look deeply into intraoral radiology interpretation with focus on periodontal, endodontic, tooth resorption and neoplastic disease in clinical cases. Limited to 20 participants. *This is a two hour lab.*

Peter Emily Zoo/Wildlife Lab - Lion's Tigers, Bear's, Monkeys and Birds – oh my! This lab will cover a variety of subjects in zoo/captive wild animal dentistry. Replicas of lion and tiger root canals will be used to simulate filling and filling lion/tiger canine teeth. Skulls of bears will be used to take radiographs. Extracted and sterilized human teeth will be used to perform endodontics, cavity preparation and restoration of primate teeth. Bird beak repairs will be practiced. Limited to 20 participants.

Rabbit and Rodent Dentistry Lab - Master the skills required to diagnose and manage one of the most frequent reasons for presentation of exotic companion mammals to your practice. Learn proper oral examination with the best equipment and perform these common procedures including occlusal equilibration and incisor and cheek teeth extraction. Limited to 30 participants.

The Technician's Role in Endodontic and Prosthodontic Procedures - (AVDT Mentees ONLY) - **Endodontics** is the branch of veterinary dentistry that involves the diagnosis and treatment of diseases of the pulp and periradicular tissue. This 2 ½ hour laboratory will demonstrate the variety of methods used to diagnose endodontic disease as well as a variety of procedures that are utilized to treat endodontic disease. These procedures include: vital pulp therapy, conventional root canal therapy, and surgical root canal therapy (apicoectomy). This laboratory will focus on the veterinary dental technician's role in preparing for and assisting in these procedures. Prosthodontics is that branch of dentistry that deals with the artificial replacement of natural teeth or associated structures. **Prosthodontics** in veterinary dentistry usually means crowns. There are many cases in veterinary dentistry where crown restoration is indicated. This 2 ½ hour laboratory will demonstrate the techniques involved with preparing teeth for crown restoration, impression taking for crown restoration as well as the procedure for crown cementation. Differences between the various crown choices (full jacket cast metal vs. porcelain) as well as 3/4 crowns will be demonstrated. This laboratory will focus on the veterinary dental technician's role in preparing for and assisting in these procedures. Limited to 30 participants.

Specialists in Training: Anesthesia- (AVDC Trainees ONLY)
Limited to 30 participants.

Anesthesia for the General Practitioner- (DVM ONLY)
Limited to 20 participants.

Anesthesia for Technician's- (Tech's ONLY)
Limited to 20 participants.

2017 VDF PROGRAM GRID - FRIDAY LABS

PRE-REGISTERED ATTENDEES ARE REQUIRED TO SIGN IN AT ROOM TO ENTER LABS.

TIME	MUSIC ROW 1	MUSIC ROW 2	MUSIC ROW 3	MUSIC ROW 4	MUSIC ROW 6
8:00-10:00am	Feline Radiography Lab "Positioning for Perfect Rads" Techs and DVM's (P. March)	Canine Extraction Lab (D. Kressin)	Endodontics 1 - Access Preparation (Balke)	Regional Nerve Blocks (B Gengler)	Essential Periodontal Therapy The Necessary Equipment and Techniques for Proper Diagnosis, Treatment and Prevention of Periodontal Disease for the Veterinarian and Technician Team (C. Weldin, R. Brannan and P. Mitchell)
10:00-12:00pm					
12:00-1:30pm	Box Lunches available in exhibit hall for registered attendees and exhibitors (1 each) **See schedule on page 4 for meetings held over the lunch hour.				
1:30-3:30pm	Canine Radiography Lab "Positioning for Perfect Rads" Techs and DVM's (G. Modrcin)	Feline Extraction Lab (J. Huff)	Restorations Lab - "Fill Me In On The Latest Restorations" (S. Spitz)	Regional Nerve Blocks (B Gengler) <i>repeated</i>	
3:30-5:30pm					

2017 VDF PROGRAM GRID - SATURDAY LABS

PRE-REGISTERED ATTENDEES ARE REQUIRED TO SIGN IN AT ROOM TO ENTER LABS.

TIME	MUSIC ROW 1	MUSIC ROW 2	MUSIC ROW 3	MUSIC ROW 4	MUSIC ROW 6
8:00-10:00am	Canine Radiography Lab "Positioning for Perfect Rads" Techs and DVM's (B. Gaddis) <i>(repeated)</i>	Feline Extraction Lab (C. Miles) <i>(repeated)</i>	Techniques for Completing Difficult Extractions and Dealing with Complications of Extractions (Root Tip Removal, Oronasal Fistula Repair, etc.) (S. Manfra and K. Bannon)	Mandibular Fracture Repair (K. Taney)	Regional Nerve Blocks and Periodontal Therapy Lab for Technicians (A. Mills)
10:00-12:00pm					
12:00-1:30pm	Box Lunches available in exhibit hall for registered attendees and exhibitors (1 each) **See schedule on page 4 for meetings held over the lunch hour.				
1:30-3:30pm	Feline Radiography Lab "Positioning for Perfect Rads" Techs and DVM's (P. March) <i>(repeated)</i>	Canine Extraction Lab (B. Hall) <i>(repeated)</i>	Crown Preparations Lab (R. Furman)	Periodontal Flap Surgery Lab (B. Niemiec)	How To Really Read that Radiograph Interactive Radiographic Interpretation Lab (D. Bellows and E. McMorrان)
3:30-5:30pm					

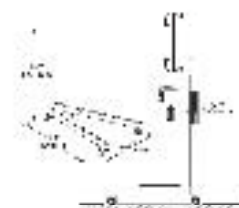

2017 VDF PROGRAM GRID - SUNDAY LABS

PRE-REGISTERED ATTENDEES ARE REQUIRED TO SIGN IN AT ROOM TO ENTER LABS.

TIME	MUSIC ROW 1	MUSIC ROW 2	MUSIC ROW 3	MUSIC ROW 4	MUSIC ROW 6
8:00-10:00am	Zoo/Wildlife Lab (S. Holmstrom)	Rabbit and Rodent Dentistry Lab (L. Legendre)	Techniques for Completing Difficult Extractions and Dealing with Complications of Extractions (Root Tip Removal, Oronasal Fistula Repair, etc.) (S. Manfra and K. Bannon) <i>(repeated)</i>	The Technician's Role in Endodontic and Prosthodontic Procedures - Open to AVDT Mentees Only VTS Training Lab (B. Hall)	Specialist In Training - Anesthesia Lab (L. Pablo)
10:00-12:00pm					
12:00-1:30pm	Lunch on your own. Exhibits close at 11:00am.				
1:30-3:20pm					Anesthesia for the General Practitioner – DVM only (L. Pablo)
3:30-5:20pm					Anesthesia for Technician's – Tech's only (L. Pablo)

IM3[®] REVOLUTION 4DC Dental X-ray

BOOTH 300
Veterinary Dental Forum 2017

Optional floor stand

Another IM3 Veterinary First!

- Smallest focal spot available 0.4mm – better image quality
- DC technology reduces radiation dosage compared to AC
- Wireless remote control – activate x-ray outside of room
- Max arm extension 230cm from wall

Simple wireless control

The Revolution 4DC features the latest technology and the full-swivel ball-joint is revolutionary in every sense. The tube head revolves freely around the sphere, so that practically any position can be achieved, including vertical. An automatic touch-sensitive lock-on/lock-off device enables effortless repositioning of the tube head between exposures.

CR7 VET - Small, Compact Dental Scanner

- Highest resolution veterinary dental scanner available
- Flexible image plates in 7 sizes
- Largest HD plate 5.7 x 9.4cm available, suitable for extremities
- Images can be viewed throughout the clinic
- No service contracts, IM3 technical support for life of scanner

The ultimate dental radiology package:
Revolution 4DC X-ray (wall mount) and the
CR7 with size 2 & 4 plates and software

We Welcome YOU to the Forum and invite your participation in the wonderful field of organized dentistry!

The Foundation for Veterinary Dentistry is working for all students, newer graduates, and more experienced veterinarians to have increased opportunities to learn dentistry.

Many students would benefit from better access to dental education in order to be adequately prepared for the clinical responsibilities of veterinary practice. One part of the Foundation's mission is to help provide increased dental education opportunities for veterinary students in the US, Canada and the Caribbean through the creation of Student Chapters of the Foundation for Veterinary Dentistry in EVERY veterinary school.

The Foundation currently has Student Chapters in 15 of the 35 veterinary schools. In order to expand and improve educational opportunities for veterinary students the Foundation would like to ask ALL interested veterinarians and students who want to help with our mission to please participate and contact Lou Ann Brown at the Foundation (lbrown@VeterinaryDentistry.org) or Dr. Mike Overend at (dmooverend@gmail.com).

"We would be very grateful for your assistance to help future veterinarians build a successful career and provide better care for their patients."

<https://www.VeterinaryDentistry.org/programs/student-chapters>

HealthyMouth, LLC has been very busy

50 Products—50 VOHC® Seals for Plaque Control

Stop by booth 202 for the latest news!

While at the booth, pick up a complimentary jug of the flavored water additive (ten flavors to choose from including blueberry, peanut butter, chicken broth and tuna)... and a free puppy!

Ooops.

The puppies are out of stock but HRH Ping Pong, Duchess of Malibu, will be there to play with and to show off her healthy mouth.

Fraser Hale, DVM, FAVD, Dipl AVDC will be there to offer his insights and answer your questions.

The Complete Veterinary Dental Home-Care Company

VENDOR PRODUCT & SERVICE CROSS-REFERENCE GUIDE

The VDF has provided the following vendor product referral guide to help you cross reference products with participating vendors. The products identified below were submitted by vendor companies. Vendor products are represented only if the vendor supplied the requested information to the VDF by August 1st or had previous records on file. Please see the complete vendor list, following this cross reference page, for a full list of participating vendors and their product descriptions. The VDF does not endorse any product or company by publishing this listing or other vendor information in this program.

Soft Rawhide Chews

- Made with American beef hide that is chopped and minced, producing a rawhide treat that is safe to chew and easy to digest
- VOHC Accepted for Tartar Control
- Clinical studies show the patented formula is proven to significantly prevent tartar build-up by more than 50%, as well as reduce bacteria, clean teeth and freshen breath
- Dogs LOVE them

VETERINARY
ORAL HEALTH COUNCIL

VOHC

Accepted®

HELPS CONTROL
TARTAR

Cat Treats & Dog Biscuits

Coated with Malic Acid, a natural ingredient found in citrus fruits, our Cat Treats and Dog Biscuits use a patented formula clinically proven to prevent plaque and tartar build up, reduce bacteria and clean teeth.

DentaTabs

Dissolving Powder for Your
Pet's Drinking Water

- Reduces plaque, tartar and gingivitis
- Freshens breath
- Formulated for dogs and cats
- Calorie free

Sprinkles

Sprinkle on your pet's meal for a delicious topping that helps keep teeth clean and breath fresh. Uses two clinically proven ingredients, Sodium Tripolyphosphate to prevent tartar formation and Cetyl Pyridinium Chloride to prevent plaque formation and malodor. Pets love the beef taste!
